

PEEDS

FOR PROFESSIONAL SPORTS

A registered brand of Paul Co.

Product Catalogue 2026-27

Our Heritage: A Legacy of Original Shoe-making Excellence

Founded in 1989 in the heart of Kolkata, West Bengal, Paul Co. was built on a foundational belief: Ergonomic footwear is the bedrock of athletic achievement. The brand was built from scratch by our Founder, **Mr. Dhananjoy Paul**. He himself has been the visionary of the brand ethos.

PEEDS is one of the very first brands of professional sports shoes based in Kolkata, inspiring the designs of several brands afterwards.

Why PEEDS

Over three decades of handcrafted manufacturing expertise PEEDS have delivered shoes curated for major sports events with an amazingly high value proposition, performance-to-price ratio. For this reason, PEEDS Shoes have often become the go-to choice for local sportsmen over international brands. We have attached a few videos as a testimony from sportspersons.

What makes PEEDS exceptional

We as shoe manufacturer have preferred quality over quantity, alongside word-of-mouth promotion and community-based popularity over showroom presentations. We merge deep manufacturing knowledge roots with agronomy-first design to serve those who refuse to compromise on performance.

The PEEDS Promise: Uncompromising Standards

PEEDS is widely recognized for fiercely upholding the definitive 'Sports Shoe Standard'. We understand that true performance in sports starts from the contact between the foot and the ground and continues through the endless pursuit of perfect posture.

How do we ensure performance?

We provide great care for the contact of the sportsman's feet to the ground and use a tri-layer sole rather than conventional moulded ones. Years of experience has taught us advanced midsole dynamics, precise chemical assembly, and superior ergonomics. We ensure that every pair of shoes optimize biomechanical movement of the feet.

Handcrafting in the era of Automation

Handcrafted designs are rare to achieve in today's competitive market. Handcraft allows for complex and compound design choices in product over simplified machine automated mass production manufacturing processes. Our process is a balance of up-close meticulous manufacturing processes and handcrafted attention to detail, backed by rigorous quality control. Our end product is embedded with excellent Human crafting skills assisted with machine aided tools and equipment.

A Tradition for every Athlete

We provide not a set of products, but a tradition. Sportsmen and customers who enter this tradition, embraces it forever. Paul Co is expanding this tradition to include the vast world of sports and fitness. From the explosive power requirement in sprint race to grounded stability needed in strength training, to the healthy streaks of daily running and morning walks - we cover a wide spectrum. Our evolving product portfolio is designed to meet the highly specific demands of a fitness enthusiast as well as of a modern athlete.

XX
